

GPS TRACKERS

Elite GPS Car Tracker

Professional 4G GPS tracking for vehicles and assets, with up to one month of standby on a single charge.

Overview

The Elite GPS Car Tracker gives you reliable location monitoring for vehicles, assets and personal tracking. It uses the 4G network to send location data you can view in real time over the internet or app, and its 10,000mAh battery with intelligent power management gives up to one month of standby. A magnetic mount and weatherproof design let you fit it without tools.

What's in the box

- Elite GPS Car Tracker
- Charging cable

Key features

- Up to 1 month standby
- 4G network connectivity
- Real-time tracking via internet / app
- Speed alerts and monitoring
- Movement and shock alarms
- Magnetic mounting
- Weatherproof design

Specifications

Dimensions	120 × 68 × 33 mm
Weight	170 g
GPS accuracy	5 metres
Battery	10,000mAh
Standby	Up to 1 month
Network	4G
Operating temperature	-20°C to +55°C

How to use

1

Charge fully

Connect the supplied charging cable and charge the tracker fully before first use. A full battery gives you the longest standby time.

2

Activate and connect

Follow the activation instructions supplied with your tracker to connect it to the 4G network and link it to the tracking app or web platform.

3**Test it outdoors**

Before fitting, take the tracker outside with a clear view of the sky and confirm its location shows correctly in the app.

4**Set your alerts**

In the app, turn on the alerts you need: speed alerts, movement alarm and shock alarm. You will be notified when they trigger.

5**Mount it**

Attach the tracker by its magnet to a clean, flat, metal surface on the vehicle or asset. Make sure it sits firmly and won't be knocked loose.

6**Track in real time**

Open the app or web platform any time to see the current location and movement history.

7**Recharge regularly**

Check the battery level in the app and recharge before it runs out. Standby time depends on how often the tracker reports its location.

For exact button and switch positions, see the manual or quick start guide supplied with your device.

Tips for best results

- For the best GPS signal, avoid mounting deep inside fully enclosed metal spaces.
- Wipe the mounting surface clean of dirt and grease so the magnet grips firmly.
- Tracking is only as good as the 4G coverage: very remote areas may delay updates.
- More frequent location updates use more battery. Balance update rate against standby time.

Care and safety

- Weatherproof, but do not submerge it in water.
- Use within the operating temperature of -20°C to +55°C.
- Keep the charging port clean and dry before charging.
- Do not open or puncture the case or battery.

Use responsibly

In Australia, tracking a vehicle or person without the consent of the owner or the person being tracked can be an offence under state and territory surveillance device laws. Only track vehicles and assets you own or have permission to track, and check the laws where you live before use.
