

AUDIO RECORDERS

Power Bank Listening Device

A fully working power bank that charges your phone while recording high-quality audio.

Overview

The Power Bank Listening Device is a dual-purpose recorder: a real power bank that charges your devices, with a hidden audio recorder inside. Its 3000mAh battery supports long recording sessions, sound-activated standby saves power during silence, and 16GB of memory holds up to 576 hours of audio. A magnetic attachment and mounting disc make positioning easy.

What's in the box

- Power Bank Listening Device
- USB charging cable
- Magnetic mounting disc
- Operation manual

Key features

- 14-day continuous recording
- Sound-activated standby
- Works as a phone charger
- 16GB memory (576 hours)
- Magnetic attachment
- Hidden recording switch

Specifications

Dimensions	93 × 27 × 23 mm
Weight	75 g
Battery	3000mAh
Memory	16GB (up to 576 hours)
Audio format	MP3, 64kbps
Recording	Up to 14 days continuous

How to use

1

Charge fully

Charge the device with the supplied USB cable before first use.

2

Start recording

Use the hidden recording switch to start recording. The operation manual shows where the switch is and how to choose continuous or sound-activated recording.

3

Position it

Leave it on a desk or bench like a normal power bank, or attach it magnetically to a metal surface. Use the magnetic mounting disc on non-metal surfaces.

4

Charge your phone

Use it as a regular power bank whenever you need to top up your phone.

5**Retrieve your recordings**

Switch off recording and connect the device to your computer by USB to open, play and copy your MP3 files.

For exact button and switch positions, see the manual or quick start guide supplied with your device.

Tips for best results

- Charging other devices draws from the same battery, so recharge afterwards to keep full recording time.
- Sound-activated mode stretches battery life by pausing during silence.
- Keep the microphone uncovered for clear audio.
- Copy recordings off regularly to keep memory free.

Care and safety

- Keep it dry and away from heat sources.
- Do not drop it or crush it, as it contains a lithium battery.
- Use only standard USB chargers.
- Do not open the case.

Use responsibly

In Australia, the laws on recording conversations differ between states and territories. In some places it is an offence to record a private conversation without the consent of everyone taking part, and recording a conversation you are not part of is generally prohibited. Check the surveillance device laws where you live before using this device, and use it only for lawful purposes.
