

AUDIO RECORDERS

USB-C Listening Device

A set-and-forget voice-activated recorder with direct USB-C playback on your smartphone.

Overview

The USB-C Listening Device activates automatically when audio begins and pauses during silence, with up to 20 days of standby on a single charge. Plug it straight into a USB-C smartphone for instant playback and file management. It offers 5 sensitivity levels, scheduled recording, a stealth mode option and a magnetic cap for easy positioning.

What's in the box

- USB-C Listening Device
- USB-C charging cable
- Time setup software
- USB C-to-A adapter
- User manual

Key features

- 5 adjustable sensitivity levels
- 20-day standby battery
- Direct USB-C smartphone access
- 8GB storage (288 hours)
- Magnetic cap for positioning
- Stealth mode option
- Scheduled recording

Specifications

Dimensions	65.5 × 11 × 19.5 mm
Weight	13 g
Memory	8GB (up to 288 hours)
Formats	PCM / XHQ / HQ
Battery	26 hours continuous / 20 days standby
Charging	1 hour USB-C fast charge
Compatibility	Windows / Mac / Android / iOS

How to use

1**Charge fully**

Charge with the supplied USB-C cable; a full charge takes about 1 hour.

2**Set the date and time**

Connect to your computer (use the C-to-A adapter if your computer only has USB-A ports) and run the time setup software.

3**Choose your settings**

Pick a recording format (PCM, XHQ or HQ) and one of the 5 sensitivity levels. You can also set up scheduled recording and stealth mode (see the user manual).

4**Start recording**

Start recording as described in the user manual. In voice-activated mode it records when sound is detected and pauses in silence.

5**Position it**

Use the magnetic cap to attach it to a metal surface, or place it near the conversation with the microphone uncovered.

6**Play back on your phone**

Plug it into a USB-C smartphone to listen to and manage recordings, or connect it to a computer to copy files.

For exact button and switch positions, see the manual or quick start guide supplied with your device.

Tips for best results

- PCM gives the highest quality but uses the most storage; HQ gives the longest recording time.
- Scheduled recording saves battery when you only need specific times covered.
- Higher sensitivity suits quiet rooms; lower suits noisy places.
- Copy recordings off regularly to keep space free.

Care and safety

- Keep it dry; it is not waterproof.
- Use only standard USB-C chargers.
- Do not force the connector into a port.
- Do not open the case.

Use responsibly

In Australia, the laws on recording conversations differ between states and territories. In some places it is an offence to record a private conversation without the consent of everyone taking part, and recording a conversation you are not part of is generally prohibited. Check the surveillance device laws where you live before using this device, and use it only for lawful purposes.

This guide is general information only and is not legal advice.
