

AUDIO RECORDERS

USB Listening Device

A USB-stick audio recorder with sound-operated recording and 64GB of memory.

Overview

The USB Listening Device uses a Super Sound Operated System (SSOS) that detects sound and pauses during silence, with 5 adjustable sensitivity levels. It records for up to 32 hours continuously, charges in about an hour, and can run on external power for unlimited sessions. With 64GB of memory, it holds up to 2,304 hours in HQ mode.

What's in the box

- USB Listening Device
- Operation manual
- Time setup software

Key features

- 32-hour continuous recording
- 64GB internal memory
- 5-level voice sensitivity
- HQ and XHQ quality modes
- 25-day voice-activated standby
- Hidden recording switch

Specifications

Dimensions	68 × 11 × 21 mm
Weight	14.6 g
Memory	64GB
Recording capacity	Up to 2,304 hours (HQ)
Battery	32 hours continuous / 25 days standby
Charging	About 1 hour via USB
Quality modes	HQ and XHQ

How to use

1

Charge fully

Plug the device into a USB port and charge for about 1 hour before first use.

2

Set the date and time

Install the included time setup software, connect the device and set the clock so recordings are timestamped correctly.

3

Choose quality and sensitivity

Select HQ or XHQ quality and one of the 5 sensitivity levels (see the operation manual). XHQ sounds better but uses more memory.

4**Start recording**

Slide the hidden recording switch to start. In voice-activated mode it waits in standby and records when sound is detected.

5**Record for longer**

For unlimited sessions, connect it to an external USB power source such as a wall charger or power bank.

6**Retrieve your recordings**

Switch off recording and plug the device into your computer to open, play and copy your files.

For exact button and switch positions, see the manual or quick start guide supplied with your device.

Tips for best results

- Use HQ for the longest recording time, XHQ when audio quality matters most.
- Set a higher sensitivity for quiet rooms and lower for noisy places.
- Avoid placing it near constant noise such as fans, which keeps it recording.
- Copy files off regularly to keep memory free.

Care and safety

- Keep it dry; it is not waterproof.
- Use only standard USB ports and chargers.
- Do not bend the USB connector.
- Do not open the case.

Use responsibly

In Australia, the laws on recording conversations differ between states and territories. In some places it is an offence to record a private conversation without the consent of everyone taking part, and recording a conversation you are not part of is generally prohibited. Check the surveillance device laws where you live before using this device, and use it only for lawful purposes.
